

In this application, we paired a Randomizer, Pal Pad and a large foam dice. Number messages were recorded into the Randomizer (1, 2, 3 etc.). Don't forget to record your messages enthusiastically and creatively; it makes the game more exciting! The large foam dice was attached to the Pal Pad. The Pal Pad was plugged into the switch jack on the Randomizer. Press the "dice" to roll! Messages can also be activated by pressing the top of the Randomizer. The VoicePal Levels also has a random messaging mode.
