

Practice ordering at a favorite eating establishment by using the VoicePal 8K, Taction Pads and Pal Pads. We recorded appropriate messages into the VoicePal 8K and created a corresponding overlay. We placed a Taction Pad on the French fry box and a Picture Communication Symbol on the Pal Pad. When the French fry box or chicken nugget symbol is pressed, an appropriate message plays (you can also access messages by using the on-board keypad). Taction Pads are great for turning actual objects into switches!
