

SwitchBoard

Adaptivation, Inc.

Congratulations on your purchase of an Adaptivation SwitchBoard. The SwitchBoard is composed of six built-in pressure switches with clear overlay pockets attached to a durable plastic backing.

The six switches correspond to the six cords with plugs. The number labeled on the plug will directly correspond to the number on the SwitchBoard. Simply plug each of the six plugs into the inputs of your communication aid or other assistive device.*

There are six pockets, so photos, symbols, or pictures can be inserted to give more meaning to each switch.

The SwitchBoard has a handle so it can be easily carried. An adjustable shoulder strap is also available. You can easily mount your communication aid or assistive device to the back of the SwitchBoard with Velcro®, Dual Lock®, or a similar product to make it a portable communication board.

* May not be compatible with all battery adapted toys.

One Year Limited Warranty

Your Adaptivation SwitchBoard was carefully tested and inspected before it was shipped. We warrant this product to be free from defects in materials and workmanship under normal use and operation for one year from the date of purchase. This warranty does not apply if the SwitchBoard has been misused, abused, altered, or tampered with. At the end of the warranty, Adaptivation shall be under no further obligation expressed or implied.

For items needing repair, contact Adaptivation's technical dept. to receive a required RMA# (return material authorization) prior to the return of the device.

This is not a medical device and should not be used where incorrect operation could result in injury or worse!
